Chahd Gharbi

Computer Science Engineering Student

Sfax, Tunisia (+216)28913018 chahd.gharbi@enis.tn **LinkedIn**

PROFILE

Third-year Computer Science Engineering student passionate about artificial intelligence, multi-agent LLM systems, and full-stack development. Experienced in AI agent engineering, deep learning applied to medical imaging, and building complex web platforms. Active member of the IEEE community, with strong involvement in technical and organizational initiatives. Currently seeking a final-year internship opportunity to further develop my technical expertise and contribute to impactful, real-world projects.

EDUCATION

Computer Science Engineering *2024 – Present*

National Engineering School of Sfax (ENIS)

Preparatory Cycle in Mathematics and Physics *2022 – 2024*

Preparatory Institute for Engineering Studies of Sfax (IPEIS)

Baccalaureate in Mathematics *2022*

Mustapha Fourati High School, Sfax

PROFESSIONAL EXPERIENCE

AI Intern – REGIM Lab *July – August 2026*

Python · U-Net · SegMamba · MedSAM · TRFE-Net · Flow-Based Models · Deep Learning

- Explored flow-based generative modeling as a tool for denoising and synthesizing ultrasound imagery
- Applied U-Net-based deep learning architectures to the task of identifying thyroid nodules
- Rebuilt and validated experiments from established medical-imaging research, translating published methodology into working code and sharpening a research-oriented approach to advanced image processing

AI Intern – LeaderTec Engineering *June – July 2026*

React · Node.js · MongoDB · AI Agents (using LLMs) · LangGraph · LangChain

- Contributed to BIZ Experience, an AI-driven business simulation platform, working across the React, Node.js, and MongoDB stack
- Designed and implemented two purpose-built AI agents: one to handle documentation queries within the game, another to assess player decisions and their downstream effects
- Wove business-logic modules and reusable React components into the platform's backend and shared design system

AI Intern – CES Lab *June 2025*

Python · TensorFlow · PyTorch · Tkinter

- Designed a desktop application for brain tumor detection, prediction, and segmentation

KEY PROJECTS

Applied Machine Learning Portfolio

Python · YOLOv8 · OpenCV · MediaPipe · Scikit-learn · XGBoost

- Built an e-commerce customer analytics pipeline combining segmentation clustering with churn-risk and customer-lifetime-value prediction models
- Trained a YOLOv8-based computer vision pipeline to detect and classify fruit types in real time
- Created an accessibility-focused sign language interpreter that reads hand gestures via MediaPipe and machine learning, then converts recognized signs into spoken text

IoT & Robotics Prototyping

Arduino · ESP32 · ESP32-CAM · Python · OpenCV · IoT Sensors · Servo Motors

- Paired an ESP32 with a heartbeat sensor to build a vitals-tracking device that streams readings to a companion mobile app and flags hypotension or hypertension in real time
- Engineered a medicine-dispensing robot that recognizes its intended recipient and scheduled dose time before releasing medication through a servo mechanism

• Prototyped a vision-guided waste-sorting bin, using an ESP32-CAM to classify refuse and route it to the right compartment via servo-driven sorting

Smart Recruit – AI-Powered Hiring Platform

React · Node.js · Express · MongoDB · Python · LLMs (Groq API)

• Engineered a dual-interface architecture that separates a public-facing candidate portal from a dedicated admin/CEO management console

• Leveraged LLMs to power an AI engine that parses résumés, extracts key entities, and scores candidate-to-job fit across multiple dimensions

• Rounded out the platform with candidate ranking, automated email alerts, interview scheduling, and JWT-secured, role-based authentication

Cross-Domain Mobile App Suite

Flutter · Java · Android Studio

• Shipped a range of mobile applications spanning retail e-commerce, boutique clothing shopping, personal health tracking, and carpooling/ride-sharing use cases

CERTIFICATIONS

- Hedera Certified Developer Associate (HCDA) – Hedera
- Hedera Business Foundation (HBF) – Hedera
- Hedera Certified Foundation (HCF) – Hedera
- Scrum Fundamentals Certified (SFC) – ScrumStudy
- C Advanced – Cisco
- AI-900: Microsoft Azure AI Fundamentals – Microsoft 365
- Introduction to Transformer-Based Natural Language Processing – NVIDIA

TECHNICAL SKILLS

Programming: Python, C, C++, Java

AI & LLM Agents: LangGraph, LangChain, RAG, NLP,Computer Vision, Deep Learning (U-Net, ResNet), YOLOv8

Web: React, Node.js, Express, HTML, CSS, JavaScript, PHP,Angular,SpringBoot, Flask

Databases: SQL, PL/SQL, SQLite3, MongoDB

Mobile: Android Studio (Java), Flutter

Tools: Docker, Git

LANGUAGES

- **Arabic:** Native
- **French:** Upper Intermediate
- **English:** Upper Intermediate

VOLUNTEERING

Vice-President – IEEE ENIS Student Branch (2024 – Present)
Past President – IEEE CIS ENIS Chapter
Organizer – "Pitch Yourself for a Career"

• Team Logistics (2024) · Team Innovation (2025)
